

Post Doctoral Research Associate Position in Genetic Engineering for high Oil Content in Soybean

A post doctoral research associate position is available immediately at the Soybean Genomics and Biotechnology Laboratory at the University of Missouri. The research focus will be on the discovery and characterization of novel genes and regulators towards the genetic improvement of seed oil content in soybean. Applicants should have a Ph.D. in genetics, molecular biology, or a related discipline. The candidate must have proven experience in the field of metabolic engineering. Experience in seed physiology and biochemistry particularly lipid metabolism is essential. Familiarity with various bioinformatics tools and genome data mining is a plus. Excellent oral and written communication skills and the ability to work well in a collaborative research environment are essential. Applicants should provide a letter of interest, a complete CV, and three reference letters. Please include the following in the subject line: "PD Application for Soybean Seed Oil" and send the above requested information to:

Dr. Henry Nguyen (nguyenhenry@missouri.edu)

Professor and Director, National Center for Soybean Biotechnology,
Division of Plant Sciences, 1-31 Agriculture Building, University of Missouri,
Columbia, MO 65211. Tel: (573) 882-5494.
